Class: C3

Stack Using Array :

INPUT :

```
#include <stdio.h>

#include <stdlib.h>

#define SIZE 5

struct stack
{
    int s[SIZE];
    int top;
};

int isFull(struct stack *st)
{
    if (st->top >= SIZE - 1)
        return 1;
    else
        return 0;
}

int isEmpty(struct stack *st)
{
    if (st->top == -1)
        return 1;
```

```

        else
            return 0;
    }

void push(struct stack *st, int item)
{
    st->top++;
    st->s[st->top] = item;
}

void pop(struct stack *st)
{
    int item;

    if (isEmpty(st))
    {
        printf("\nStack is empty! Underflow.\n");
    }
    else
    {
        item = st->s[st->top];
        st->top--;

        printf("\nThe popped element is: %d\n", item);
    }
}

void display(struct stack *st)

```

```

{
    int i;

    if (isEmpty(st))
    {
        printf("\nStack is empty!\n");
    }
    else
    {
        printf("\nStack elements are:\n");

        for (i = st->top; i >= 0; i--)
        {
            printf("%d\n", st->s[i]);
        }

        printf("TOP = %d\n", st->top);
    }
}

```

```

int main()
{
    struct stack st;
    int choice;
    int item;
    char ans;

    st.top = -1;

```

```
do
{

    printf("IMPLEMENTATION OF STACK\n");
    printf("1. PUSH\n");
    printf("2. POP\n");
    printf("3. DISPLAY\n");
    printf("4. EXIT\n");

    printf("\nEnter your choice: ");
    scanf("%d", Cchoice);

    switch (choice)
